

Delivering added customer value: 3 MEYLE-HD engine mounts replace 6 OE parts!

Going smart: MEYLE-HD parts for the Smart Fortwo, Smart City Coupe/Cabrio and Smart Roadster.

Root causes of engine mount damage include frequent temperature changes from ambient air to operating temperatures, excessive vibration and high engine loads. The result: reduced driving comfort and unpleasant operating noise.

Determined to improve part durability and workshop service quality the MEYLE engineers have developed MEYLE-HD engine mounts to cater for a wide range of Smart models. Thanks to its custom-formulated rubber material, each MEYLE-HD engine mount is suitable for use in both Diesel and petrol engines. With its universal design the MEYLE solution eliminates the need to stock double inventories. And saves you precious time and money!

To deliver maximum customer value MEYLE recommends that the all three engine mounts be replaced at once. Streamlining process efficiency, the MEYLE full-service kit (MEYLE ref.: 014 024 1175/HD) supplies all required engine mounts.

Key specifications of MEYLE-HD engine mounts at a glance:

- Longer service life thanks to excellent drive torque absorption and engine weight support
- Low-noise operation thanks to advanced noise and vibration decoupling and isolation
- Stringent quality control procedures ensure full customer satisfaction

4-year guarantee for MEYLE-HD!
